Document ID: VIB-MKT-002 Classification: INTERNAL CONFIDENTIAL Effective Date: 2024-04-01 Version: 5.1

Document Owner: VP, Customer Success (Enterprise)

Customer Reference Matrix: VI Business (India)

1) Executive Purpose and Applicability

The Customer Reference Matrix supplies Bid Managers with contactable, enterprise-class customer references who maintain legally signed consent forms permitting oral or email-based operational validation checks from RFP scoring committees.

Intended Audience: Bid Managers, Request For Proposal (RFP) Response Desks.
Applicability: Strict internal directory utilized when a Customer explicitly demands "Contactable Client References" or "Reference Call Scheduling."

2) Definitions and Assumptions

Definitions:

- **Reference Tier:** The complexity/scale of the deployment (Tier 1 corresponds to multi-crore, massive distributed networks).
- **NDA:** Non-Disclosure Agreement.

Assumptions:

- **Internal Control:** Do not arbitrarily append reference contacts to a bid without explicitly verifying the "Last Verified" validation date. Stale contacts may negatively impact scoring if they have exited their respective corporate roles.

3) Detailed Core Sections

3.1 Primary Logistics & Supply Chain Reference

- **Scale/Scope:** 350+ Node SD-WAN & Unified Managed Security (SOC) Transformation.
- **Primary Value Prop Vouched For:** Rapid Zero-Touch Provisioning (ZTP), seamless cloud SIEM ingestion, SLA adherence.
- **Consent Status:** Authorized for direct email verification and 30-minute structured reference calls.
- **Last Verified / Re-certified Date:** `2024-01-15`

3.2 Financial Sector & High-Availability Reference

- **Scale/Scope:** 500+ Branch Network, Active-Active HA Edge, fully segregated Data Localization (DPDP Act compliance).
- **Primary Value Prop Vouched For:** <50ms stateful failover across terrestrial and LTE links, Azure ExpressRoute stability.
- **Consent Status:** Email verification only. Phone calls require an escalated two-week lead time warning.
- **Last Verified / Re-certified Date:** `2024-02-28`

3.3 Enterprise IoT & Manufacturing Reference

- **Scale/Scope:** 50,000+ active M2M SIM telemetry network over Custom APN (cAPN) terminating into AWS.
- **Primary Value Prop Vouched For:** Secure private routing, large-scale SIM portal management, isolated routing logic.
- **Consent Status:** Authorized for broad cross-referencing.
- **Last Verified / Re-certified Date:** `2024-03-10`

4) Evidence and Proof-Artifact Map

Reference Code	Signed Consent Artifact	Internal Owner Map
Ref-Logistics-01	`SharePoint/VIB_Success/Consent_Ecom.pdf`	Account Director - National Logistics
Ref-Finance-01	`SharePoint/VIB_Success/Consent_Bank.pdf`	Strategic Account Manager - BFSI

5) Governance and Ownership

- **Owner:** VP, Customer Success (Enterprise)
- **Reviewers:** Legal Counsel, Enterprise Sales Heads.

- **Review Frequency:** Quarterly. The matrix is purged of personnel who have transitioned corporations or explicitly revoked consent.

6) Constraints, Exclusions, and Dependencies

- **Process Constraint:** Bid Managers *must* email the designated Internal Account Director (the Owner) prior to officially proposing a reference in a live bid to ensure the Customer is not currently amidst a severe P1 operational escalation, which would naturally sour the reference check.
