Pricing Catalog and Rate Card: VI Business (India)

1) Executive Purpose and Applicability

This Pricing Catalog defines the standard commercial models, Operational Expense (OpEx) frameworks, billing triggers, and volume thresholds utilized by VI Business (India). It establishes the numerical pricing boundaries bid authors must consult before structuring cost proposals for Tier-1 enterprise clients.

Intended Audience: Commercial Managers, Pricing Analysts, Deal Desk. **Applicability:** For designing required "Commercial Assumptions", OpEx matrices, and TCO evaluations in telecom bounds.

2) Definitions and Assumptions

Definitions:

- **MRC:** Monthly Recurring Charge.
- **OTC:** One-Time Charge (Installation/Setup).
- **OpEx:** Operational Expense (Hardware as a Service).

Assumptions:

- **Internal Control:** Placeholder INR rates depicted herein represent the standard un-discounted rack rate. Bid-specific discounting models require systematic Deal Desk margin validation depending on deal TCV.
- All structured network endpoints (CPE/Firewalls) remain the capital property of VI Business unless an explicit asset transfer clause is authorized.

3) Detailed Core Sections

3.1 SD-WAN and Edge Connectivity Brackets Costing spans underlay bandwidth, overlay orchestrated routing, CPE hardware leasing, and unified NBD break-fix support.

Connectivity Tier	Bandwidth Capacity	Indicative MRC (INR/Month)*	Indicative OTC (INR)*
Edge Broadband (FTTx)	100 Mbps - 300 Mbps	₹ 8,000 - ₹ 15,000	₹ 15,000
DIA Enterprise Fiber	50 Mbps - 500 Mbps	₹ 25,000 - ₹ 75,000	₹ 50,000
Active 4G/LTE Backup	Pooled 50GB	₹ 1,500 - ₹ 3,000	₹ 5,000 (Incl. Router)
Core Hub 1 Gbps PtP	Full duplex NLD		₹ 1,00,000

Connectivity Tier	Bandwidth Capacity	Indicative MRC (INR/Month)*	Indicative OTC (INR)*
		₹ 1,50,000+ (Distance Var.)	
(Prices are illustrative baseline representations; regional transmission variants apply).			

3.2 Hyperscaler Interconnect Subscriptions

- **Pricing Structure:** MRC is dictated exclusively by the committed port speed terminating at NESCO / Chennai.
- **Indicative MRC:** 1 Gbps (approx. ₹ 45,000/mo) scaled to 10 Gbps (approx. ₹ 2,25,000/mo).
- **Note:** The MRC covers the Layer 2/3 cross-connection to the peering point. The enterprise customer strictly absorbs egress/transit data fees levied independently by Microsoft Azure or AWS.

3.3 Managed SOC and SIEM Licensing

- **Pricing Structure:** Scaled against ingestion volume measured in Events Per Second (EPS) or daily log GB limits, combined with a flat MRC tracking integrated SD-WAN edge points.
- **Value-Add Mechanism:** L1/L2/L3 security analyst escalations and incident containment structures are aggregated cleanly into the prevailing MRC. There are no surprise hourly "time-and-materials" charges for chasing down P1 anomalies.

3.4 IoT Enterprise Mobility (EMM)

- **Volume Discount Breaks:** Massive MRC reductions activate at distinct scale markers: 100k, 500k, 1M, and 2.5M SIMs.
- **Data Pooling:** To isolate customers from radical billing variations, enterprise fleets leverage aggregate Custom APN data pools. Individual endpoint overages do not trigger penalty rates unless the total accumulated organizational limit breaches capacity.

3.5 Billing Validation Criteria

- **Trigger Condition:** Monthly billing for an individual location securely activates 24 hours subsequent to validated ZTP configuration loading and formal User Acceptance Sign-off on stability.

4) Evidence and Proof-Artifact Map

Data Category	Reference Ledger	Owner
Current List Options	`SharePoint/VIB_Commercial/Master_RateCard.xlsx`	Head of Pricing
CPE Transport Costs	`Logistics_Depreciation_Engine.xlsx`	Supply Chain

5) Governance and Ownership

- **Owner:** VP, Deal Desk & Pricing
- **Reviewers:** Chief Financial Officer (EBU).
- **Review Frequency:** Quarterly.

6) Constraints, Exclusions, and Dependencies

- **Exclusions:** Legacy telecommunications contract termination penalties (owed by the client to an incumbent carrier for disconnecting legacy MPLS) are excluded and strictly will not be absorbed or "bought out" by VI Business (India).
