Document ID: VIB-PROD-001 Classification: INTERNAL CONFIDENTIAL Effective Date: 2024-04-01 Version: 6.2

Document Owner: VP, Product Management

Products and Services Master Catalog: VI Business (India)

1) Executive Purpose and Applicability

The Master Catalog acts as the exhaustive, definitive dictionary outlining all universally available VI Business (India) solutions and associated SKU terminology. Adherence to this taxonomy guarantees proposed solutions map flawlessly to actual operational fulfillment systems.

Intended Audience: Bid Teams, Solution Architects, Pre-Sales. **Applicability:** For verbatim insertion into RFP "Product Compliance Checklists", "Proposed Solution Inventories", and generating precise Bills of Materials (BOM).

2) Definitions and Assumptions

Definitions:

- **SKU:** Stock Keeping Unit (Unique Identifiers for VI fulfillment).
- **CPE:** Customer Premises Equipment.

Assumptions:

- **Internal Control:** Missing from this catalog signifies non-standard capabilities. Submitting non-catalog solutions limits deployment scalability and mandates explicit, prolonged Deal Desk / Engineering approvals.

3) Detailed Core Sections

3.1 Connectivity Underlay (The Access Network)

Solution Category	Standard Product SKU	Description Boundaries
Enterprise Broadband	`VI-ACC-FBR-DIA`	Dedicated Internet Access: 50 Mbps up to 1 Gbps. Symmetrical SLA-backed fiber delivery.
Cellular Backup	`VI-ACC-LTE-B2B`	Managed 4G/LTE active backup via industrial SIM. Failover preservation.
Core Transmission	`VI-ACC-NLD-PTP`	Point-to-Point National Long Distance optical paths anchoring primary Tier-1 Data Centers.

3.2 SD-WAN Overlay & Edge Security Services

Solution Category	Standard Product SKU	Description Boundaries
SD-WAN Standard Edge	`VI-SDW-BAS-CPE`	Hardware-agnostic basic overlay enabling Application-Aware routing. Includes ZTP support.
SD-WAN Advanced Edge	`VI-SDW-NGFW-ADV`	Converged SD-WAN controller with embedded Next-Gen Firewall (NGFW) for deep packet inspection.
Hub Aggregation	`VI-SDW-HA-HUB`	Dual-Chassis High Availability (Active/Active) node designed exclusively to handle `99.99%` uptime dependencies.

3.3 Data Center & Cloud Interconnects

Solution Category	Standard Product SKU	Description Boundaries
Azure Cross-Connect	`VI-CLD-AZURE-ER`	Dedicated ExpressRoute pipe reaching Azure Central India (Pune) MMR from NESCO DC. `<8ms` latency.
AWS Cross-Connect	`VI-CLD-AWS-DX`	Layer 2/3 Direct Connect termination pushing directly into AWS ap-south-1 (Mumbai).

3.4 Managed Security Services (SOC)

Solution Category	Standard Product SKU	Description Boundaries
Core SIEM Ingestion	`VI-SEC-SIEM-ING`	DPDP Act localized log ingestion (100% India-hosted). Scalable per EPS/GB bounds.
Threat Containment	`VI-SEC-MTR-247`	Managed Threat Response. 24/7/365 active boundary containment executed via ITIL v4 methodologies.

3.5 Enterprise IoT & Mobility

Solution Category	Standard Product SKU	Description Boundaries
EMM Platform Portal	`VI-IOT-EMM-BAS`	Unified fleet tracking dashboard capable of scaling dynamically across millions of active tags.
Secure Endpoint SIM	`VI-IOT-SIM-CAPN`	Industrial hardened M2M SIM locked firmly to an isolated VI Custom APN (cAPN) preventing public routing.

4) Evidence and Proof-Artifact Map

Product Portfolio Area	Internal Spec Sheet
SD-WAN Product Deck	`SharePoint/VIB_Products/SDWAN_Spec_v6.pdf`
Cloud Interconnect Guide	`SharePoint/VIB_Products/Cloud_Interconnect_Routes.pdf`

5) Governance and Ownership

- **Owner:** VP, Product Management

- **Reviewers:** VP Core Networks, Deal Desk, Enterprise CISO.
- **Review Frequency:** Quarterly alignment with OEM firmware cycles and catalog depreciation rules.

6) Constraints, Exclusions, and Dependencies

- **Constraints:** High-bandwidth Private Cloud Interconnects (`VI-CLD-AZURE-ER` scaling over 10 Gbps) explicitly require localized capacity validation checks against our Mumbai NESCO optical transport nodes before formally quoting to clients.
- **Applicability Exclusion:** Reselling of bare-metal AWS/Azure compute VMs (non-networking) is excluded from the VI Business core networking solutions and requires separate systems integration partnerships.
