Document Owner: Head of Enterprise Legal and Risk Management

Insurance Coverage Summary: VI Business (India)

1. Executive Purpose and Document Scope

The Insurance Coverage Summary outlines the corporate liability, cyber risk, and physical asset insurance shields maintained by Vodafone Idea Limited (VIL) specifically applicable to the VI Business (India) enterprise operations.

This artifact provides verifiable indemnification facts for Bid Writers and Legal Counsel to satisfy the mandatory risk transfer clauses demanded by stringent enterprise Request for Proposals (RFPs), particularly within the highly regulated Indian Banking (BFSI) and multinational corporate sectors.

2. Definitions, Assumptions, and Applicability

Definitions:

- **CGL:** Commercial General Liability.
- **E&O:** Errors and Omissions (Professional Indemnity).
- **AOA / AOY:** Any One Accident / Any One Year (Policy Limit structures).

Assumptions:

- The insurance policies listed herein are maintained at the consolidated VIL corporate level. Distinct, separate policies are *not* purchased per individual enterprise customer contract unless explicitly priced and approved by the Enterprise Deal Desk.
- All limits are quoted in Indian Rupees (INR) or US Dollars (USD) where global reinsurance treaties apply, converted at the prevailing RBI reference rate.

Applicability:

- **Target Audience:** Enterprise Legal Reviewers, RFP Compliance Teams, and Contract Negotiators.
- **Scope:** All managed network, IoT, and SOC contracts executed under standard Master Services Agreements (MSA).

3. Core Insurance Types and Coverage Scope

VI Business maintains a comprehensive, multi-layered risk transfer portfolio backed by Tier-1 Indian and global underwriters.

3.1 Commercial General Liability (CGL)

- **Scope:** Protects against claims for third-party bodily injury and tangible property damage occurring on customer premises due directly to the negligence of VI Business personnel or authorized field ecosystem partners.
- **Example Trigger:** A VI field engineer accidentally damages a customer's core router chassis while racking an SD-WAN CPE.

3.2 Professional Indemnity (Errors & Omissions - E&O)

- **Scope:** Covers financial losses suffered by a customer arising strictly from a proven failure of VI Business to perform the professional telecom and managed IT services as defined in the signed BoM and SLA.
- **Example Trigger:** A misconfigured BGP route by the NOC causes a 6-hour nationwide outage for a retail chain, leading to a proven financial loss claim beyond standard SLA credits.

3.3 Cyber Liability Insurance

- **Scope:** Covers third-party claims arising from a failure of the VI Business core network security leading to unauthorized access, data breach, or transmission of malicious code originating centrally from the VI infrastructure.
- **Exclusion:** Does *not* cover breaches originating from the customer's own insecure LAN or compromised edge endpoints.

4. Coverage Limits and Bands

The following structural limits represent the aggregate corporate baseline.

Insurance Category	Policy Limit (Aggregate AOY)	Per Occurrence Limit (AOA)	Primary Underwriting Consortium
Commercial General Liability	INR 250 Crores	INR 50 Crores	New India Assurance / ICICI Lombard
Professional Indemnity (E&O)	USD 50 Million	USD 10 Million	AIG / Chubb (Global Reinsurance Treaties)
Cyber Liability	USD 25 Million	USD 5 Million	HDFC ERGO / Beazley
Workmen's Compensation	Under Statutory Limits	Under Statutory Limits	Various Regional Providers

Note: Workmen's Compensation adheres strictly to the Workmen's Compensation Act, 1923 (India).

5. Applicability by Service Type

- **Managed SD-WAN & MPLS:** Covered heavily by E&O for configuration faults, and CGL for physical installation risks.
- **Security Operations (SOC):** Exclusively covered under the Cyber Liability umbrella for missed IOCs (Indicators of Compromise) leading to a proven breach, subject to strict forensic limitations.
- **Raw Bandwidth (Unmanaged ILL):** E&O is generally inapplicable as the SLA penalty mechanism (Service Credits) acts as the sole, exclusive remedy for downtime.

6. Certificate and Evidence Notes

Customers frequently demand proof of these policies within 15 days of contract signature.

- **Certificate of Insurance (COI):** Redacted COIs evidencing current validity periods and aggregate limits can be generated upon request by the Account Manager via the internal Legal Portal.
- **Naming Customers as "Additional Insured":** Standard Legal policy *blanket rejects* adding individual Indian enterprises as "Additional Insured" on the master VIL corporate policies.
    - **Fallback Position:** If an RFP mandates this, Legal will offer a "Waiver of Subrogation" clause within the MSA instead.

7. Constraints, Exclusions, and Dependency Notes

- **Liability Caps:** The absolute existence of a USD 50 Million E&O policy does *not* imply VI Business accepts an equivalent liability cap in a customer contract. The standard commercial MSA hard-caps VI Business's total liability at 100% of the trailing 12-month Total Contract Value (TCV). The insurance acts only as the corporate backstop for that liability.
- **Force Majeure:** No insurance policy reacts to service failures caused by designated Acts of God (e.g., severe monsoons, earthquakes) or government-mandated internet shutdowns.

8. Proposal-Use Guidance

- **Compliance Matrix:** Extract the table in Section 4 to answer "What limits of insurance do you carry?"
- **RFP Clarifications:** If an RFP demands "INR 500 Crores of CGL", the Bid Writer must immediately file a legal clarification stating: "VI Business adheres to a corporate AOY limit of INR 250 Crores, which we deem commercially sufficient for the scope of services proposed."

9. Governance and Ownership

- **Owner:** Head of Corporate Risk and Insurance (VIL)
- **Reviewers:** Head of Enterprise Legal, CFO.
- **Update Cadence:** Annual review corresponding with the March 31st policy renewal cycle.
